

Audit report

Category (SEO or Accessibility?)	Issue analysed	Explanation	Good practice to adopt	Action recommended	Reference
SEO	Tap targets are not sized appropriately	Links are to close each other and text colour hard to read	Tap targets are have to be appropriately	Change links height and text colour	https://web.dev/tap-targets/?utm_source=lighthouse&utm_medium=devtools
Performance	Serve images that are appropriately-sized to save cellular data and improve load time	Images size are too big	Use an Image Manipulation Program to change size and format	Change size and format	https://web.dev/uses-responsive-images/?utm_source=lighthouse&utm_medium=devtools
Accessibility	<html> element does not have a valid value for its [lang] attribute. Reduce unused rules from style sheets and defer CSS not used for above-the-fold content to decrease bytes consumed by network activity.	The lang attribute was set to default	Find the lang attribute	Change default to en	https://www.w3.org/International/questions/qa-html-language-declarations
Accessibility	Remove words from keywords meta tag	The website do not use bootstrap.css	Find the css link	remove the unused css link	https://web.dev/unused-css-rules/?utm_source=lighthouse&utm_medium=devtools
Accessibility	Remove words from keywords meta tag	Repeat same words in this line	Find the lines	Remove duplicate words	https://www.w3schools.com/tags/tag_meta.asp
Performance	Minifying JavaScript files can reduce payload sizes and script parse time	In the JavaScript file if I remove the space between the codes the load time is reduced	Copy the JavaScript into a minifying website to remove the space in the code	Put the codes into minifying website	https://web.dev/unminified-javascript/?utm_source=lighthouse&utm_medium=devtools
Accessibility	Low-contrast text is difficult or impossible for many users to read.	I find a class with keywords name in the body white text colour and 1px text size	Remove it because a google crawler don't like repeat keywords in the body section	Remove the lines	https://web.dev/color-contrast/?utm_source=lighthouse&utm_medium=devtools
Accessibility	In the navigation section the Home and Contact me button text was white on the white background	User can't see the buttons if the text colour and a background colour is same	Find the nav section and class name change the colour in the css file	Change the colour to black colour	https://web.dev/font-display/?utm_source=lighthouse&utm_medium=devtools
Accessibility	Image elements do not have [alt] attributes	Informative elements should aim for short, descriptive alternate text. Decorative elements can be ignored with an empty alt attribute.	Find the image and give to alt attribute descriptive alternate text	Give the alt attribute descriptive alternate text	https://web.dev/image-alt/?utm_source=lighthouse&utm_medium=devtools
Accessibility	In the title tag was a dot	User don't see in the browser tab what is your website name	Fill the title tag white your website name	I changed the title tag to GoMikeDesign	https://www.w3schools.com/tags/tag_title.asp
