Category	Issue analyzed
(SEO or Accessibility?)	
SEO	Tap targets are not sized appropriately
Performance	Serve images that are appropriately-sized to save cellular data and improve load time
Accessibility	<html> element does not have a valid value for its [lang] attribute.
Accessibility	Reduce unused rules from stylesheets and defer CSS not used for above-the-fold content to decrease bytes consumed by network activity.
Accessibility	Remove words from keywords meta tag
Performance	Minifying JavaScript files can reduce payload sizes and script parse time
Accessibility	Low-contrast text is difficult or impossible for many users to read.
Accessibility	In the navigation section the Home and Contact me button text was white on the white background
Accessibility	Image elements do not have [alt] attributes
Accessibility	In the title tag was a dot

Links are to close each other and text colour hard to read

Images size are too big
The lang attribute was set to default

The website do not use bootsrap.css
Repeat same words in this line

In the JavaScript file if I remove the space between the codes the load time is reduced
I find a class with keywords name in the body white text colour and 1px text size
User can't see the buttons if the text colour and a background colour is same
Informative elements should aim for short, descriptive alternate text. Decorative elements can be ignored with an empty alt attribute.
User don't see in the browser tab what is your website name

Tap targets are have to be appropriately

Use an Image Manipulation Program to change size and format
Find the lang attribute

Find the css link
Find the lines

Copy the JavaScript into an minifying website to remove the space in the code
Remove it because a google crawler don't like repeat keywords in the body section
Find the nav section and class name change the colour in the css file

Find the image and give to alt attribute descriptive alternate text
Fill the title tag white your website name

Action recommended

Change links height and text colour

Change size and format

Change default to en

remove the unused css link

Remove duplicate words

Put the codes into minifying website

Remove the lines

Change the colour to black colour

Give the alt attribute descriptive alternate text

I changed the title tag to GoMikeDesign
